

**Alcohol Free Hand Sanitiser Range For Own Label
For Professionals & Consumers**

Research & Development

Extensive UK based research and development has resulted in a formulation containing an optimised synergistic blend of active ingredients which have been independently tested for efficacy against a broad range of bacteria and virus independent laboratories to the following standards;

- EN 1040
- EN 1276
- EN 13697
- EN 1656
- EN 1275
- EN 1500

Independent Testing

The formulation has been proven to give rapid log reductions within minutes against the following bacteria and virus, further details and copies of the test certificate are available for review

- *Listeria monocytogenes*
- *Klebsiella pneumoniae*
- *Leptospira interrogans*
- *Streptococcus uberis*
- *Enterococcus hirae*
- *Clostridium difficile*
- *Escherichia coli*
- Herpes simplex
- Vancomycin resistant enterococcus
- *Pseudomonas aeruginosa*
- *Acinetobacter baumannii*
- *Staphylococcus aureus*
- Hepatitis C
- SARS
- MRSA
- H1N1

Any Time & Any Place

The combination of our effective formulation and standard pack sizes make our products suitable for both general public and professional users allowing effective waterless sanitisation in many situations

Professional Market

- Vets
- GP's surgeries
- Restaurants
- Health visitors
- Food production
- Care homes
- Hospitals
- Dentists

General Public

- At home
- Gym & sports
- In the kitchen
- While shopping
- Camping
- In the office
- Hobbies
- While travelling

Alcohol Free & More

The formulation contains naturally derived ingredients and is free from alcohol, fragrance and animal derived ingredients while being enriched with moisturisers allowing the product to be used many times a day without it drying hand out like alcohol based products can.

500ml Pump Foamer

If it's not possible or undesirable to install a wall dispenser, but you are still looking to provide hand sanitisation at entry points, rest rooms or in kitchens this unit is the ideal substitute. Product is dispensed as a foam which can be easily spread around the hands giving fast and effective sanitisation. Each unit will give up to 1000 applications making it highly efficient and economical to use.

50ml Pump Foamer

This 50ml pack dispenses the product as a foam which is easily spread around the hands giving great coverage and economy with up to 280 applications per unit. Although slightly larger in dimensions than our mist spray this pack is still compact enough to be kept in hand bags, pockets and the car as well as at a place of work providing quick, effective on the spot sanitisation.

50ml Tottle with Clip (Mist Spray)

This tottle is convenient unit with a clip which can be attached to a retractable chord giving a visible sign to customers and patients that infection control is a priority and providing staff a way of always having a hand sanitiser available. This unit dispenses the product as a mist which can be easily spread over the hands and gives up to 250 applications.

Wall Dispenser

A robust unit for 800ml refill pouches dispensing product as foam and giving up to 1600 applications from a single bag. This wall unit provides a secure way of making hand sanitiser product available to staff, the public and visitors to your site while being a visible sign at entrances and in rest rooms that hand hygiene is important.

800ml Refill Bag

This bag simply connects to the dispensing system on the wall unit within seconds giving up to 1600 applications

Your Own Sanitiser Range Instantly

We pride ourselves on our ability to understand the requirements of our customers and take a professional approach to meet these needs while providing the highest levels of service and support. Our company has depth and skill in all areas of product development, manufacturing, sales and marketing meaning you only have to deal with one company to have a complete finished product. We are able to add your label to the standard packaging units instantly giving you a range of products with an independently tested formulation proved effective against a range of virus and bacteria.

In House Artwork Services

Our in-house team can work with your existing high resolution files in Adobe Illustrator, jpeg or pdf format. If you don't already have a design we have standard templates to which your logo can be added or a new design can be created for you meeting the requirements of your brief - there is a design fee involved for this work.

There are no limitations on the number of colours, images or fonts that can be included in your design and can be printed onto clear, white or frosted label material. Once finalised a pre production sample of your product will be prepared including the label and a digital photo e-mailed to you for your review.

Apart from the cost of designing a new label, we don't charge for extras such as plates, cutters, set up fees or any associated costs.

Case Dimensions

Product	Units Per Case	Case Dimensions	Case Weight	Product Label Dimensions
50ml Tottle	130	200 x 295 x 410mm	9kg	Custom shape
50ml Pump Foamer	48	160 x 270 x 240mm	5kg	100 x 65mm
500ml Pump Foamer	12	185 x 355 x 265mm	7kg	170 x 45mm
