

Roll Antiperspirants & Deodorants For Private Label

We can offer products based on a range of ingredients to provide effective antiperspirant benefits. These can be formulated with anti inflammatory and soothing actives to calm skin for example after shaving and the latest ingredients to reduce the rate of hair regrowth.

Alternatively we can offer deodorants with no antiperspirant effect. These products are of particular interest to more naturally focused markets where there can be a preference for aluminium free formulations or perspiration is considered a natural process of the body which should be allowed to happen. As such these products do not prevent under arm perspiration, but can be formulated with ingredients which prevent the growth of bacteria which can cause odour.

- ✓ Daily
- ✓ Sport
- ✓ Sensitive
- ✓ Natural Based
- ✓ Non Whitening
- ✓ Fragrance Free
- ✓ Cream Based

Free From

- ✓ Animal Derivatives
- ✓ Parabens
- ✓ Amines
- ✓ Dyes

Natural Ingredients

Formulations can be adapted to include natural oils and extracts to fit with your brief and provide additional skin benefits to the product. Popular examples are Avocado Oil, Chamomile, Tea Tree, Vitamin E, and Sunflower Oil. If you have your variants identified, but are unsure which natural ingredients would support them we are happy to put forward suggestions.

Essential Oils

If you prefer to not use traditional fragrances essential oils and fruit extracts can be used in their place. Commonly used oils are Lemongrass, Lavender, Bergamot and Orange. We can also formulate with extracts from Berries which have natural aromas.

Fragrances

We have a set of standard fragrances available for common variants in the market such as sport, sensitive and daily use. Fragrances can be formulated into the product to match your brief.

Through our relationship with a number of packaging manufacturers we are able to offer a wide range of bottle shapes and ball sizes. The bottle and cap can be coloured to your specific pantone and labelled front and back. When needed we can also supply box packaging and merchandisers for on shelf display and point of sale.
