

Supporting Your Product Development At Every Stage

With a passion for generating ideas, identifying product opportunities and delivering them to the highest standard USP Laboratories aims to become recognised as the United Kingdoms premier developer of unique and differentiated products

Formed in 2008

USP Laboratories was founded in 2008 to design and develop high quality products for the global cosmetics and toiletries market. We develop formulations using the latest advances in packaging and ingredient technology to create unique and differentiated products which meet the needs and expectations of consumers.

Products can be developed in almost any sector of the personal care market and tested to support claims if required. Projects can range from starting with an idea and blank page to taking a product ready for branding from our catalogue. We offer a range of services to support you at any stage of the development and manufacturing process.

Focus On Quality

A quality product is not only one that is carefully developed and manufactured from the finest raw materials. It is also one that meets with the needs and expectations of your customer.

Close enough is not good enough and we go the extra mile to make sure every aspect of the product matches with the needs of your target market and delivered to you as agreed.

Sectors

Creams, lotions, foaming and non foaming liquids can be developed with various colours, fragrances and additives or if desired avoiding particular ingredients in the following categories.

- Antibacterial Products
- Hair Care & Styling
- Bath & Shower
- Natural Products
- Baby Care
- Male Grooming
- Body Care
- Salon & Spa
- Self Tan
- Deodorants

Our Services

- Viability Study – Prototype & Costing
- Product Design & Branding
- Formulation Development & Testing
- Contract Production
- Consultancy & Partnership
- Formulations & Products for Sale

The Benefits

- Investigate opportunities faster
- Reduce the pressure on internal resources
- Flexible support by using us as and when need to do what is needed
- Add an extra dimension to you R&D capabilities with new ideas and technology
- Quickly expand your product range to enter new markets

Viability, Prototype & Costing

Discuss with us in confidence your idea and review the technology available to see if it's possible. Starting with a blank page or your crystallized ideas we will:

- Design a prototype formulation and create a product prototype
- An indication on the costs and time line involved with progressing the project
- Indication on the unit cost at manufacture

This study is a low cost and effective way of quickly screening an opportunity. Working with us minimises the time, effort and resource required by you allowing you to delegate this time consuming process to focus on other priorities.

Formulation Development & Testing

Taking the prototype product and developing it further so it looks and performs as you require. Stability and product integrity testing is carried out on all formulations and when required performance testing can be conducted to support on pack claims. We can compile the product information pack, ensure compliance with regulations. By using us from start to finish the details of your product remain confidential and the time taken to reach market is maximized to full effect.

- Further development of the prototype if required
- Samples for review & approval
- Stability & Packaging Compatibility Testing
- Microbiological Challenge Testing
- Compilation of Product Information Pack

The costs involved with this stage depends on the extent and complexity of the development work, number of variants and any testing required supporting claims. At this point you can buy the formulation and rights from us and/or we can supply you with finished goods.

Contract Production

Your existing product can be produced, packed, labelled and coded to your requirements. Internal quality procedures ensure raw materials are checked, the method of manufacture followed, product is filled correctly and a certificate of analysis issued reflecting your specification.

Hot and cold process production is available with a negotiable run size on a wide range of products.

Consultancy & Partnership

When you require R&D or flexible manufacturing capability that understands your market, listens to your requirements and delivers what has been agreed USP Laboratories is your partner of choice. We understand the value of having a partner you can rely on and we strive to provide a reliable and efficient service at all times

If you need to carry out a single project or long term outsourcing we can support you at with any aspect such as development, regulatory issues or manufacturing.

Formulations & Products for Sale

As a result of our love for developing products we have a catalogue of concepts, ideas and developed products ready to take to market. These can be bought outright and all rights transferred to you or licensed from us.
