

Hand sanitisation with *Your Logo*

Extensive UK based research and development has resulted in a formulation containing an optimised synergistic blend of active ingredients which have been tested for efficacy against a broad range of bacteria and virus by independent laboratories to the following standards; EN1040, EN1276, EN1275, EN13697, EN1656, EN1500.

50ml Pump Foamer

This 50ml pack dispenses the product as a foam which is easily spread around the hands giving great coverage and economy with up to 280 applications per unit. This compact unit can be kept in hand bags, pockets and the car as well as at a place of work providing quick, effective on the spot sanitisation.

Minimum Order

10 cases x 48 = 480

Customise the point of sale case and retail to your customers?

500ml Pump Foamer

If it's not possible or undesirable to install a wall dispenser, but you are still looking to provide hand sanitisation at entry points, rest rooms or in kitchens this unit is the ideal substitute. Product is dispensed as a foam which can be easily spread around the hands giving fast and effective sanitisation. Each unit will give up to 1000 applications making it highly efficient and economical to use.

Minimum Order

4 cases x 12 = 48
